1. Introduction

This document provides an overview of USPS® product and service changes currently planned for implementation in support of the Competitive Price change, scheduled for January 17, 2016. These changes impact the *PostalOne!* system and includes a description of changes to Shipping Service File rate ingredient for eVS.

2. Summary of Changes

The USPS will update the rate ingredients in the SSF versions 1.6, 1.7 and 2.0. These changes include, but are not limited to validations and remapping for discontinued USPS products, introduction of new Service Type Codes (STCs), and specification updates to add support for new products.

Changes for discontinuation USPS products

- Eliminate First-Class Package Service Commercial Plus Pricing [337]
- Eliminate of Priority Mail Regional Rate Box C. Default setting to the single piece price when weight is included; when weight is not included default to a manifest error. [351]
- Eliminate of Critical Mail [416]
- Eliminate Priority Mail Express Flat Rate Box [339]
- Elimination of Parcel Select - ONDC Presort and NDC Presort [343]
- Eliminate Parcel Return Service NDC [330]

Changes to validations

- Add IMpb non-compliance criteria [438]
- Extend First-Class Package Service Commercial Base Pricing weight breaks to 15.999 oz. [337]
- Combine Parcel Select Lightweight® machinable and irregular price tables into a single table formatted according to the current irregular price table [474]

Change to add Support

- Introduction of new Extra Services for Pharmaceuticals and Critical Shipments [439]

3. Extra Services for Pharmaceuticals and Critical Shipments [439]

In order to provide increased visibility for pharmaceuticals and medical shipments USPS will be introducing two new Extra Service Codes (ESC) for use in the Shipping Services File. Available only with a Negotiated Service Agreement (NSA) these new extra service codes will trigger additional events and alerts and provide a longer retention on tracking events.

These ESC are applicable to the following mail classes: Priority Mail Express, Priority Mail, First-Class Package Service, Parcel Select, Parcel Select Lightweight, Metropost, Priority Mail Express International, Priority Mail International, First-Class Package International Service. They will not alter the Service Type Code.

ESC	Description
401	Pharmaceutical
402	Medical Supplies

4. Rename Parcel Select® Nonpresort to “Parcel Select Ground™ [341]

Parcel Select® Nonpresort will be renamed to “Parcel Select Ground™”. This is a name change only and mail preparation and other requirements will remain intact. There will be no changes to the Mail Class Codes used in the Shipping Services File, “GND” is an acceptable abbreviation for “Ground” in labeling.

5. IMpb Barcode, Address Barcode and Shipping Services File Quality (BNS 438)

Currently mailers are assessed IMpb compliance fees based on three factors: an IMpb on the mailpiece, transmission of a Shipping Services File version 1.6 or greater, and inclusion of required elements in the Shipping Services File. eVS supports identification of packages which bear the IMpb and be able to verify IMpb compliance thresholds for each mailing. Effective with the January 2016 price change, the following additional criteria will be verified as part of IMpb compliance:

- **SSF File quality:** eVS which includes validation of the following rate and payment fields: Rate Indicator, Destination Rate Indicator, Zone, Weight and Postal Routing Barcode as well as the dimensions and extra service code fields when applicable. Currently, missing or incorrect data in these fields results in a warning; however, USPS is signaling its intention to enforce the required inclusion and correctness of this data.
- **Barcode quality:** This will include the readability of barcodes (print quality) as well as barcode construction (proper STC, check digit, etc.).
- **Address validation:** Street addresses included in the Shipping Services File will be verified to insure they are Delivery Point Validated.

The new thresholds are intended for the following packages which today are required to bear the IMpb: Priority Mail Parcels, Priority Mail Express, Metro Post, First-Class Mail Package Service, Parcel Select and Parcel Select Lightweight postage statement line S23 in postage statements in the Extra Services section Part S in PS Form 3600 FCM, 3600 PM, and 3605. On line S23, mailers can report pieces which 1) do not meet SSF file quality, 2) barcode quality, or, 3) address validation.

The three validations will be processed separately; the number of pieces that fall below each of the new three thresholds will be calculated separately. Only one verification that yields the largest number of pieces below threshold will be used for charging the Extra Service fee. If the mailing fails in one of these three areas (including the current thresholds) and falls beneath the threshold, the *PostalOne!* system will apply the IMpb Noncompliance fee to the pieces from the verification that yields the largest number of non-compliant pieces.

Shipping Services File require no changes. eVS will require new validations.

6. Rate Ingredient Changes

The following section details the modifications to valid rate ingredient combinations specified in **Publication 205, Appendix G: Service Type Code and Rate Ingredient Tables** in support of the proposed product changes.

6.1. Eliminate Commercial Plus Pricing for First-Class Package Service and Offer Commercial Base Prices up to 15.999 ounces

Presort is eliminated for First-Class Package Services (FCPS). Mailers are highly encouraged to switch all Shipping Services File entries to the single piece (SP) rate indicator for First Class Package Services, however, for backwards compatibility, eVS will continue to support obsolete CPP and presort rate indicators which will be recalculated back to the applicable single piece price. The maximum weight for FCPS Commercial Base is increased to 15.999 ounces.

7.2 Eliminate Priority Mail Regional Rate Box C

Rate ingredient for the Priority Mail Regional Rate Box C is eliminated. Mailers are highly encouraged to switch all Shipping Services File entries to the single piece (SP) rate indicator for Priority Mail Regional Rate Box C, however for backwards compatibility, eVS will continue to support obsolete the rate indicators which will be recalculated back to the applicable single piece price when weight is included and resort to Manifest Error when the weight is not included.

7.3 Eliminate Critical Mail

The USPS will discontinue Critical Mail for both letters and flats categories for Priority Mail Critical Mail and for Priority Mail Critical Mail with Signature.

Mailers are highly encouraged to switch all Shipping Services File entries to the single piece (SP) rate indicator for Priority Mail Critical Mail, however for backwards compatibility, eVS will continue to support obsolete the rate indicators which will be recalculated back to the applicable Priority Mail Commercial Plus Flat Rate Envelope rate ingredient if mailers continue to use the obsolete rate ingredients.

6.2. Eliminate Priority Mail Express (PME) Flat Rate Box

Rate ingredients for Priority Mail Express Flat Rate Boxes are eliminated. Mailers are highly encouraged to switch all Shipping Services File entries to the single piece (PA and PP) rate indicator for Priority Mail Express Flat Rate Boxes, however for backwards compatibility, eVS will continue to support obsolete rate indicators which will be recalculated back to the applicable single piece price when weight is included and resort to Manifest Error when the weight is not included.

6.3. Eliminate Priority Mail Express (PME) 10:30AM

Rate ingredients Priority Mail Express Flat Rate Boxes 10:30AM are eliminated. Mailers are highly encouraged to switch all Shipping Services File entries to the single piece (1J) rate indicator for Priority Mail Express Flat Rate Boxes 10:30AM, however for backwards compatibility, eVS will continue to support obsolete rate indicators which will be recalculated back to the applicable single piece price when weight is included and resort to Manifest Error when the weight is not included.

6.4. Eliminate Parcel Select ONDC Presort and NDC Presort.

Rate ingredients for Parcel Select ONDC Presort and Parcel Select NDC Presort are eliminated. Mailers are highly encouraged to switch all Shipping Services File entries to Parcel Select Ground prices, however for backwards compatibility, eVS will continue to support obsolete rate indicators which will be recalculated to the corresponding Parcel Select Ground rate ingredients (previously known as Parcel Select Nonpresort).

6.5. Parcel Select Lightweight Irregular and Machinable Price Tables

The Parcel Select Lightweight[®] machinable and irregular price tables will be combined into a single table formatted according to the current irregular price table. Mail preparations will remain the same for Machinable and Irregular presorted parcels. Mailpieces will need to be identified as machinable or irregular in the Shipping Services File for eVS. Machinable parcels will still not be able to be sorted or dropped at a Sectional Center Facility (SCF). No impact to the eVS rate ingredients for Parcel Select Lightweight.

6.6. Return Network Distribution Center (RNDC)

Rate ingredients for the Return Network Distribution Center (RNDC) as a pickup point for Parcel Return Service are eliminated. Mailers are highly encouraged to switch all Shipping Services File entries to Parcel Select Ground prices, however for backwards compatibility, eVS will continue to support obsolete rate indicators which will be recalculated to the corresponding Parcel Select Ground rate ingredients (previously known as Parcel Select Nonpresort).

6.7. Priority Mail International Regional Rate Box C

Rate ingredient for Priority Mail International Regional Rate Box C is eliminated. Mailers are highly encouraged to switch all Shipping Services File entries to the single piece (SP) rate indicator for Priority Mail International Regional Rate Box C, however for backwards compatibility, eVS will continue to support the obsolete rate indicator which will be recalculated back to the applicable single piece price when weight is included and resort to Manifest Error when the weight is not included.

6.8. Priority Mail Express International Flat-Rate Boxes

Rate ingredients for Priority Mail Express International Flat-Rate Boxes are eliminated. Mailers are highly encouraged to switch all Shipping Services File entries to the single piece (PA) rate indicator for Priority Mail Express International Flat-Rate Boxes, however for backwards compatibility, eVS will continue to support the obsolete rate indicator which will be recalculated back to the applicable single piece price when weight is included and resort to Manifest Error when the weight is not included.

Pub. 205 Appendix G - eVS Valid Rate Ingredient Combinations

Summary of Changes – Jan 2016:

New information is bold and underlined.

Obsolete information is grayed out and strikethrough with a single line.
